

PLASTIC AND COSMETIC SURGERY

CENTRO MEDICO TEKNON
BARCELONA

Looking good and feeling better, in the hands of the best professionals

The Plastic and Cosmetic Surgery Service of Centro Médico Teknon is made up of six internationally renowned teams who carry out all cosmetic and plastic surgery procedures and who manage to stay at the forefront of their specialities thanks to their teaching and training work.

Our specialists' experience, our exquisite treatment, our highly satisfactory patient results and our excellence in medical care are some of the reasons why, every year, patients from all over the world come to Teknon and place themselves in the hands of the centre's Plastic and Cosmetic Surgeons. Teknon's teams of specialists are experts in all kinds of medical and surgical treatments, such as facial surgery, body contouring, rejuvenation and reconstructive surgery after illnesses such as breast cancer and other kinds of lesions.

At Centro Médico Teknon we take care of every last detail so that each patient can experience an exclusive and personalised treatment thanks to the comfort of our facilities and the support of the latest technologies, in both in-patient and out-patient interventions.

Nose and breast surgeries, two of our most successful procedures

Nose surgery or rhinoplasty and breast augmentation surgery or mammoplasty are two of the operations for which our Centre is internationally renowned, offering patients excellent levels of satisfaction.

Rhinoplasty serves to correct the shape and size of the nose, as well as to improve functional respiratory problems. The technique requires a high degree of specialisation and surgeons must study each case individually to achieve the best results for each face.

Breast augmentation surgery is one of the cosmetic interventions that has most improved in recent years, and currently enables patients to achieve perfectly natural results provided the operation is carried out by highly specialised surgeons.

Teknon, excellence in an exclusive environment

Located in Barcelona, Centro Médico Teknon is one of the leading hospitals in Spain's private health sector and is home to some of Europe's best medical professionals, making it a centre of excellence in all medical and surgical specialties. The centre adheres to a strict quality management culture geared to patients, in an environment of maximum safety, which has earned it several international accreditations.

With our patients' comfort in mind and with the aim of anticipating the needs of patients from across Europe, the International Patients Programme takes care of all the necessary details for their wellbeing and satisfaction, including a door to door service, travel planning, picking up from the airport and transferring to the clinic or hotel. We also provide a translation service for patients who require it, as well as an assistance service for your relatives during your stay in our city.
